

KILL ODOR CITRUS

FOR PROFESSIONAL USE ONLY

Excellent all purpose deodoriser designed for pre-spraying as a contact deodoriser to kill odours. Quat for use on mould, mildew, spore and fungi as well as vomit, smoke, perspiration, rancid foods, oils and many more problem odours.

General usage

Effective on even hardest to remove odours

Works on urine, vomit, smoke, perspiration, medicinals, and rancid foods and oils.

Especially formulated for the professional in-plant or on location carpet cleaner.

Can be used in plants with drying rooms to eliminate the odor sources which result from high humidity or can be applied on location as pre-spray to treat carpet itself.

Can be used to treat odours in the carpet backing or pad

Kill Odor will work deep down in the carpet backing or pad to effectively neutralise odours and their sources when applied with a needle injector. Needle injecting of Kill Odor is an economical alternative to the expensive method of taking up carpet to remove odours.

Also removes odours and odour sources found on hard surfaces

Effective in the removal of odours from ceramic tile, concrete, wood, vinyl, plastic, marble and other hard surfaces. May be wiped, sponged or mopped with the finest results expected on hard surfaces. An excellent replacement for harsh pine oil cleaners.

A valuable part of odour removal programs

The ability of Kill Odor to accomplish odour elimination makes it ideal as part of a complete odour elimination program.

Economical to use: Kill Odor is concentrated for use up to 64:1 on hard surfaces.

Concentrated Kill odor allows you to Meet the "odour demand" the first time.

Hints and Tips

Easy to use: simply spray properly diluted Kill Odor on affected area using a portable hand pump sprayer or electric sprayer. May also be added to the cleaning solution to provide a "special" clean fragrance to both carpet and air.

Directions to use:

As a pre-spray

1. Generally dilute Kill Odor with 5 parts water. For very heavy odours, dilute with less water
2. Using hand pump sprayer or electric sprayer apply liberally on affected area with a coarse spray. Caution DO NO USE Concentrated OR Diluted Kill Odor in a fogging machine.
3. Allow to remain on affected area as long as possible. Then clean using generally accepted carpet cleaning techniques. If odour persists, repeat procedure.
4. If entire carpet needs treatment, the amount and dilution depends on strength of the odour.
