## LIQUID FORMULA 90

FOR PROFESSIONAL USE ONLY

**Triple strength new generation, multiple dilution carpet detergent. Suitable for polypropylene, nylon or Woolsafe approved depending on dilution. Perfect for TruckMount flexibility or high performance in your portable. One chemical for high performance on all fibres**

### General Usage

#### Most economical cost per use on the market

One of the highest dilution ratios on the market! Can be diluted at Woolsafe approval levels 960:1 – that's 20mls of product to 19L of water. Can also be diluted 320:1 (60mls to 19L) for even more cleaning power. Just think of how many houses just one concentrated Litre of Liquid Formula 90™ will clean!

#### Dry, brittle residues

**Liquid Formula 90™** dries to a non-tacky, dry, brittle powder which can easily be vacuumed away. Allows a longer lasting, high level of appearance between cleanings.

#### Safe on a variety of carpet fibres

Between 960 :1 and 500 :1 this product is WoolSafe approved

At 360 :1 Liquid Formula 90 offers aggressive high pH cleaning on even the dirtiest Polypropylene carpets. This all adds up to Formula 90 being the most versatile, high performance carpet detergent in the world.

### All the power of a powder in liquid form

We are confident that **Liquid Formula® 90** will out perform any other detergent on the market. It even performs comparably to the industry's top selling powder, **Powdered Formula 90™**, when diluted 320:1.

### Hints and Tips

#### Easy to use

**For truckmount, concentrated stock solution** mix 1L to 19L of warm water, see product label for detailed metering instructions.

#### Light soil or stain-resistant carpet:

**To make a ready-to-use solution** (for portables) mix 20mls to 19L of warm water. (960:1 dilution ratio)

#### Moderate Soil:

**To make a ready-to-use solution** (for portables) mix 30mls to 19L of warm water. (640:1 dilution ratio)

#### Heavy Soil:

**To make a ready-to-use solution** (for portables) mix 60mls to 19L of warm water (320:1 dilution ratio)

### Liquid Formula 90 Characteristics

pH Value:	960:1	9.5 - 10.5
	650:1	10.5 - 11.0
	320:1	11.0 - 11.5
Coverage:	5,950 sq. m per 4 L (at 500:1)	
Dilution:	Variable (see label)	
Appearance:	Light blue liquid	
Fragrance:	Citrus	
Packaging:	Single 3.78L or case of 4	
Re-order Code:	Single: LF901G	
	Case: LF904G
