ORIENTAL RUG SHAMPOO

FOR PROFESSIONAL USE ONLY

Safely handles delicate rug fibres and sensitive dyes in all carpet fibres. Suitable for on site or in- plant cleaning. A "Woolsafe" approved shampoo for use in equipment that is equipped for high foam only i.e. Rotary Shampoo machines.

General usage

Buffered pH

The optimally efficient pH range of 7.0 – 7.3 yields maximal cleaning while safely handling sensitive dyes.

Free rinsing

Specially formulated to leave a minimum of residue, leaving a plush hand and maximum sheen.

Approved for use on wool

Independently tested for use on wool according to The Woolsafe Organisation's performance criteria.

Helpful Hints

1. Thoroughly vacuum the entire carpet before cleaning.
2. Place cardboard or plastic under machine when filling tank over carpeted area.
3. Use a hand brush to clean corners and other areas the machine cannot reach.
4. Clean carpet in 1 metre squares if using a rotary cleaning machine. When cleaning with a foam generating machine, clean in a straight line and overlap after each pass.
5. Use a hand pile brush to set pile in one direction after cleaning.
6. Use plastic protectors under all furniture that will touch the wet carpet.
