## ONE CLEAN POWDER DETERGENT

FOR PROFESSIONAL USE ONLY

**Powdered 'Woolsafe' high performance detergent. Super concentrated for high performance results on all carpet types. Use in portable or truck mounted extraction machines.**

### General usage

#### End confusion

If you're thoroughly mixed up over what type of detergent to use on which fibres, worry no more **Chemspec's One Clean®** is the answer. **One Clean®** was developed to clean all fibres by all manufacturers.

#### Even the major fibre manufacturers agree

Think of it! The giants of the carpet fibre industry approve the use of **One Clean®** on their carpet fibres. Never again will you have to check and see who made the carpet fibre before cleaning in order to find out if the detergent you have is right. **One Clean®** effectively and safely cleans them all!

#### Lowers your inventory costs

Before **One Clean®** was developed, to properly clean all types of carpet and to protect carpet manufacturers warranties, you needed to stock many types of detergents in order to assure you had the correct one. Now you only need **One Clean®**. You save with volume purchasing, cut waste, plus you need less space on trucks and vans

### Hints and Tips

#### Protects your customers' warranties

You what a headache it is protecting your customers' manufacturers' warranties. Well, now your headaches are over. **One Clean®** has been approved by the leading fibre manufacturers to protect their warranties when used as directed.

#### Easy to use

For a truck mount, mix 680gm per 20L of water, for portable, you only need to mix 2 oz (2 scoops / 56gm) per 20L of water.

**Tested by The Woolsafe Organisation as safe to use on wool fibres without rinsing.**
