PROFESSIONAL SPOT LIFTER

FOR PROFESSIONAL USE ONLY

Specially formulated "Woolsafe" product, for maximum spotting performance. Gentle on the fibres, but tough on many different types of stain problems. Optimum performance but gentle for delicate fibres.

General usage

Easy to Use – 26 years of research and development have led to this easy-to-use spotter for all carpet cleaning personnel. The simple spray and blot technique requires no training for you or your staff and the product works well on oil and water soluble spots.

Use in hospitals, institutional and healthcare industries- As well as excellent performance on domestic carpet stains Chemspec have worked with these industries through a network of carpet care experts to identify the specific types of spots which are unique to these types of facilities. Professional Spot Lifter helps take care of food and beverage spills as well as impossible spills like iodine and medication spills.

A water based multi-purpose spot remover Effective on oil and water based stains such as blood, soft drinks, light grease, oil, and tar. Light coffee, tea, floor finishes, iodine, copier toner, spills, dirt, grime and more formulated after 26 years of research and development.

Hints and Tips

Spray onto the affected area and blot with an absorbent cloth, continue applying and blotting until all the stain is removed.

Rinse thoroughly after use with water by blotting or extracting.

Professional Spot Lifter works well as a pre-treatment for dye, coffee and tea spills and if the carpet has been affected by the dye leave the spotter residue in place before applying the suitable coffee stain remover e.g. Helpmate C.S.R. or Spray n Go. The exceptional wetting agents in Professional Spot Lifter will help the coffee stain removers to absorb completely into wool fibres that are notoriously harder to remove dye from.

Professional Spot Lifter Characteristics

pH Value:	8.5 – 9.5
Coverage:	Variable to use and application
Dilution:	Use neat
Appearance:	Clear Liquid.
Fragrance:	Citrus
Packaging:	Single 1L or case of 12
Re-order Code:	Single: UKPRSLLT Case: UKPRSL12

PRE-TEST ALL AREAS TO BE TREATED.
