

DRY FOAM

DRY FOAM CARPET SHAMPOO

- Prevents over-wetting of carpets for quicker drying
- Foam detergent quickly suspends dirt
- Reduces resoiling of carpets

USES

An effective carpet shampoo, designed to clean carpets without over wetting the material fibres.

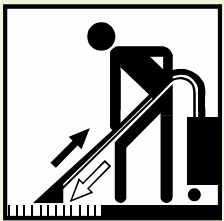

The detergent in the formula quickly suspends dirt and the anti-redeposition agent reduces the effect of re-soiling.

Ideal for carpet cleaning in establishments where carpets need to be cleaned quickly, and be ready for traffic in a short space of time.

DIRECTIONS

1. Before commencing work, remove all moveable furniture and vacuum the carpet.
2. For stains or more heavily soiled areas, pre-treat with SAS 20 spot and stain remover.
3. Dilute one part DRY FOAM carpet shampoo with 15 parts warm water and shampoo the carpet, following the machine manufacturer's instructions.
4. Allow the carpet to dry completely. This allows DRY FOAM to extract and unstick soiling on the fibres.
5. Thoroughly vacuum the carpet to remove the loosened dirt.

N.B. ALWAYS TEST FOR COLOUR FASTNESS BEFORE USING DRY FOAM CARPET SHAMPOO.

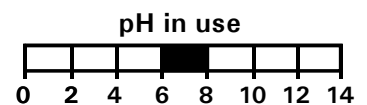

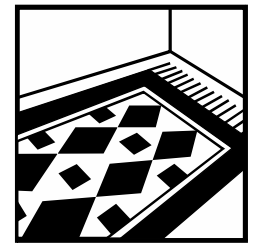

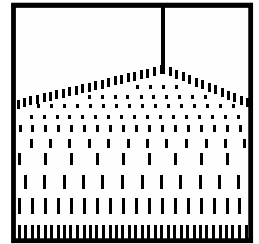

DILUTIONS

DRY FOAM : WATER

1:15
